MEMORANDUM FOR THE RECORD

SUBJECT: Trip Report: Visit to Warner Robins Depot

1. On the 9th and 10th of December 1969 a visit was made to the Project Depot at Robins AFB for the purpose of reviewing support contract funding to date, contractors' expenditures and commitments to date, and projecting, to the extent possible, year end funding requirements for each support contract. A detailed review was conducted with the requirements officers and the project officers at the Depot.

2. At the present time it appears that funding for IDEALIST Peculiar and IDEALIST/SENIOR YEAR Common accounts will be more than adequate to cover the fiscal year 1970 total requirements. Total funding (Customer 1, 2 and common) in the airframe accounts should be adequate, provided certain agreed upon charging procedures are implemented. Funding for camera support will be adequate, and at the present time it appears that we will have a substantial surplus in the airborne electronic category in the common account. Support for the pilot related systems and equipment is adequately covered.

3. Coordination is being effected with the contracting officers in CMD/OSA to incorporate revised funding in the support contracts as agreed during this visit.
